YOUR TIME HAS COME

A Maurice Lacroix is more than just a timekeeper; it's a statement of success, an investment in style and a mark of luxury. Each hand-crafted piece begins with the timeless quality of Swiss tradition, which we blend with outstanding design to create tomorrow's classics. The day you invest in a Maurice Lacroix will be a day to remember. Wearing one tells the world that your time is now.

YOUR TIME IS A MARVEL.

At Maurice Lacroix, we understand and work with time every day, so it should come as no surprise that we have made the most of our time. We know that every second counts and that is why we have achieved so much in so little time. Since the development of our first watch in 1975 we have won scores of awards and an abundance of patents for our unique, innovative timepieces. Over 38 years of incredible achievements, our company has cemented its place among the respected watchmakers of Switzerland.

Our aim is not only to preserve the traditions of Swiss watch making but to innovate and expand on that tradition. We handcraft all of our own groundbreaking designs, from magnificent faces to flawless movements. The result is a collection of timepieces that uniquely merge heritage and tradition with cutting edge engineering. We have written our own history and will continue to redefine the future of watch making. We make the most of time because our time is now.

YOUR TIME IS
MAURICE
LACROIX

YOUR TIME IS OUR PASSION.

Maurice Lacroix timepieces are manufactured from the finest materials, to the highest standards, by the most talented craftsmen and women. We use sapphire crystal that can only be scratched by diamonds and „autolubrificant“ components made from silicium (Silicon). Each watch is engineered so precisely it can run for 3,044 years, using the same amount of energy it takes to power a TV left on standby for one night.

YOUR TIME IS PERFECTLY FLAWLESS.

With numerous awards, patents and designs for new movements and complications, our watches aren't just perfect in form but also in function.
